

## EMA Starts a Revolution in the VMS' & Charter World With the New Hybrid BlueTraker® Family of Transponders

Celje, Slovenia, October 30, 2007 – For this year's 20<sup>th</sup> anniversary of the METS fair in Amsterdam, EMA will have the honour and the opportunity to present their new Hybrid family of Transponders:

- **BlueTraker® VMS**
- **BlueTraker® 2200**

On the 13<sup>th</sup> of November the Hybrid Transponder BlueTraker® 2200 will compete for the DAME award 2007, which developers see as a proof of its excellence.

This revolutionary products for the fisheries and charters has been created in a town of Celje, in the North-East of Slovenia. After more than 2 years of hard team work, EMA is launching its new Hybrid Family of Transponders that will change the way vessels will communicate forever.

The ultra-modern Hybrid allows small and big fisheries, motor boats and sail boats to communicate for a smaller amount of money than ever before. Thanks to its avant-garde technology, the BlueTraker® VMS & BlueTraker® 2200 Transponders become very reliable system which communicates via GPRS network along the coast and switches automatically to Satellite communication system while on the high sea.

For additional information on the **BlueTraker®** please feel free and send us your mail to [info@bluetraker.com](mailto:info@bluetraker.com).
