To Whom It May Concern

Supply of BlueTrakerVMS transponders and VMS Software for the fishing vessel tracking and monitoring system in the UK

We hereby confirm that EMA d.o.o., Slovenia has successfully delivered an overall of **1435 BlueTrakerVMS transponders** during 7 years as well as VMS system software for the UK VMS project. The timeframe of fulfilling initial contractual obligations was December 2012 until May 2013.

In the later years until year 2020 the initial installed base was substantially increased. The goods were grant aided to the UK Fishing Authorities.

BlueTrakerVMS terminals always successfully passed on-vessel and laboratory tests required for acceptance.

The on-board system consists of:

- BlueTrakerVMS terminal
- Connection Box with Alert Button and In-port button
- Marine grade cable set
- Mounting bracket - Unimount

The VMS system software is a communication middleware running from Cloud and fulfilling communication needs of the system.

We remain at your disposal for any further information that you may require. Yours sincerely

David Davies
Director
